ERIC SCHNURRENBERGER JOINS QUALYSENSE FOR AN INTERNSHIP

Eric is enlisted for a one-month internship. QualySense is an EMPA based start-up company focused on innovative grain and seeds sorting technology.

Eric will be working in the marketing department of QualySense. Eric is a student athlete at Notre Dame University in South Bend, Indiana where he is studying International Economics.

Eric says: “I am real thrilled to have the opportunity to apply my learning from the university lecture hall to QualySense, a promising start up that is currently entering a highly potential market”.

Dr. Francesco Dell’Endice: “We are very pleased to have Eric, a brilliant international and multilingual student, as part of our team for this summer to cover one of our key internship positions”.

About QualySense

QualySense is the worldwide industry leader focused on delivering innovative high-end sorting solutions to achieve optimal processing, quality, and safety of agricultural products. We are the leaders in the development of efficient, high-capacity technologies for analyzing and sorting grains, seeds, and beans according to biochemical and morphological traits. Breeders, seed producers, food processors, and inspection agencies worldwide can now benefit from high-speed non-destructive individual kernel analysis and sorting according to the biochemical and morphological traits of their products. QualySense was founded in 2010 and has been awarded a number of prizes and grants. The company is rapidly growing and has lately received the Swissparks “Best Startup of 2012” award.
